

## Employee Charting System

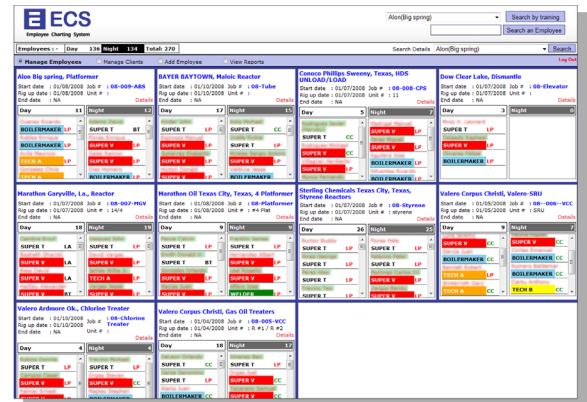

# Software for Resource Scheduling and Tracking

Employee Charting System (eChart) allows your company to access and understand information on all employees in one centralized location. With eChart, everything and everyone has a place. Tested in both small and large companies, echart has been proven successful saving on time and cost.

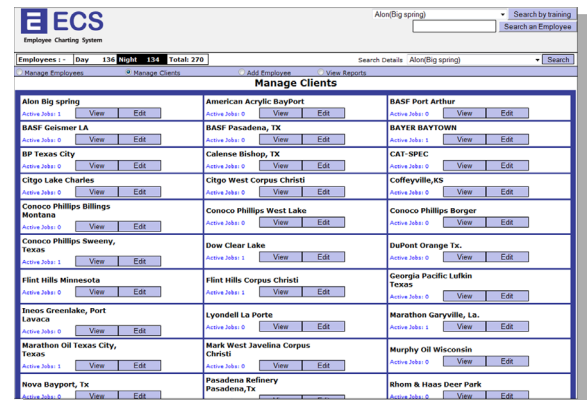

With eChart, you can track unlimited employees without paying user fees. In one centralized location you are easily able to track which job the employee is on, verify trainings required, as well as check expiring trainings and permits for each employee. With easy access to your employee database online, eChart allows you to manage your resource requests quicker and easier.

### Software Highlights:

- Dashboard with current and future jobs
- Track employees, vehicles & equipment
- Centralized Labor reqs handling
- Manage employee trainings (Internal & External)
- House complete job history of employees
- Document hub (DL, Utility bill, SSN etc)
